MAIN RISKS OF THE FUND

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization. EMERGING MARKETS: Operating conditions and supervision in "emerging" markets may deviate from the standards prevailing on the large international exchanges and have an impact on prices of listed instruments in which the Fund may invest. CURRENCY: Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. LIQUIDITY RISK: The Fund may hold securities with reduced market exchange volumes and which may, in certain circumstances, be relatively illiquid. The Fund is therefore exposed to the risk that it may not be possible to liquidate a position in the desired time frame and at the desired price.

The Fund presents a risk of loss of capital.
